Subject: FW: Superfund Site consultant

I don't think his property will be affected in any way. As I noted in my email to him his property is outside of the Superfund site boundaries, as it shown in the fact sheet he references

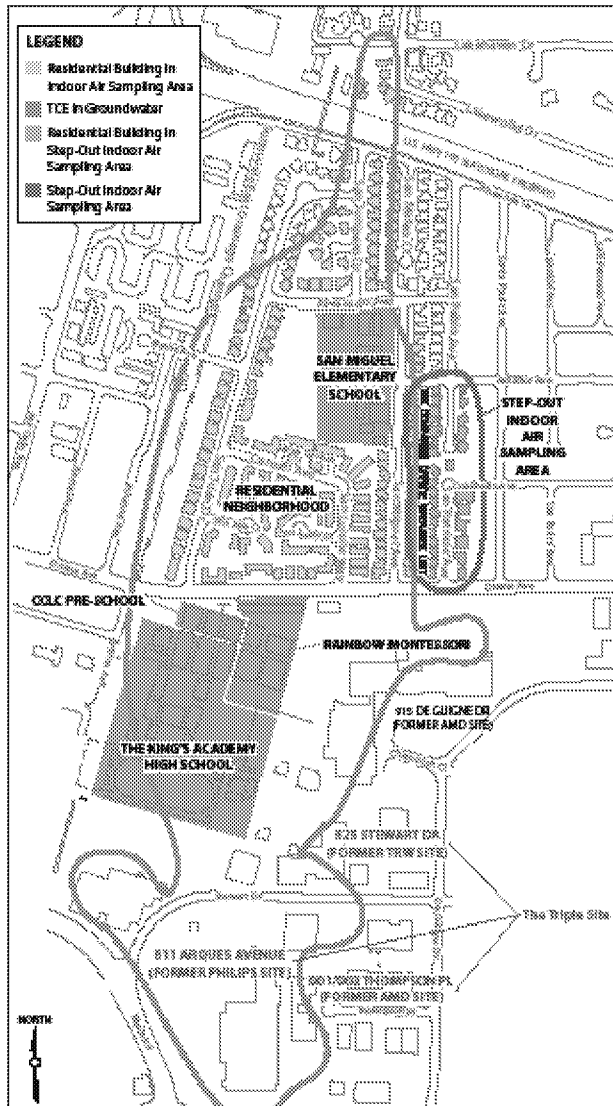

Figure 2: Original indoor air sampling area and step-out indoor air sampling area. Approximate extent of TCE contamination above 5 micrograms per liter (µg/L) in shallow groundwater (around 10 feet).

Michael

Hi, Edwin, Michael:

Here is the link I found indicating that there's Vapor intrusion into residential properties. The news seems concerning, although it's a few years old.

Do you think our property was or will be affected in any similar way? Any records related so far? How is the situation? Thank you very much

Thank you very much! Edwin! We were told to make the decision by the end of this weekend. We wish to hear from them sometime today.

Looking forward to hearing from them. Thank you again.
